

Nelnet Payment Services

Release Notes for March 2025

Implementation Summary

Nelnet Payment Services (NPS) will deploy the following projects to the Production environment on March 31, 2025:

- **PCI Scanner:** NPS is implementing PCI scanning functionality in our portals to ensure the integrity and authorization of payment page scripts rendered in a consumer's browser. This functionality will also detect and remediate any unauthorized changes on payment pages. This functionality was deployed to the UAT environment on March 26, 2025. These changes are being made to comply with PCI DSS v4.0 standards (PCI DSS Requirements 6.4.3 and 11.6.1) which must be in place by March 31, 2025.

Upcoming Deployment

- **Web Asset Security Implementation – CSP and SRI:** NPS is updating its Content Security Policy and Subresource Integrity configuration to comply with PCI DSS v4.0 standards. This project was deployed to the UAT environment on March 27, 2025.

Client Action and Recommended Testing

Client action is not required for these enhancements. However, you should review this information to determine potential impacts to your business processes, policies, and systems to support these enhancements. Clients who choose to utilize these features are strongly encouraged to complete testing prior to implementing them in their production environment.

The NPS User Acceptance Test (UAT) environment is available for clients to test new functionality and for regression testing. NPS strongly recommends that you perform regression testing to ensure that your system continues to perform as expected.

For general assistance, contact [NPS Client Services](#) or call 1.866.431.4637.

The information in this document is confidential and proprietary and is distributed to Nelnet Payment Services clients for their exclusive use in operating NPS applications. It may not be reproduced in any form without prior written permission from NPS, LLC.
