

# Nelnet Payment Services

## Release Notes for May, 2023

### Implementation Summary

Nelnet Payment Services (NPS) is deploying the projects listed in these release notes to UAT on May 19, 2023 and to PROD on May 24, 2023:

- TSYS TransIT Recertification
- Global Payments Integration and Certification

### Multi-Iteration/Coded but Not Yet Deployed

Any project(s) listed here will not be live at the time of the deployment dates indicated above; but are part of a project that will be used in a later release:

- Rapid Connect Recertification
- Apple Pay Integration and Certification

### Client Action and Recommended Testing

Client action is not required for these enhancements. Review this information to determine potential impacts to your business processes, policies, and systems to support these enhancements. Clients that choose to utilize these features are strongly encouraged to complete testing prior to implementing in their production environment.

The NPS User Acceptance Test (UAT) environment is available for clients to test new functionality and for regression testing. NPS strongly recommends that you perform regression testing to ensure that your system continues to perform as expected.

If you have questions, contact [NPS Client Services](#) or call 1.866.431.4637 for assistance.

The information in this document is confidential and proprietary and is distributed to Nelnet Payment Services clients for their exclusive use in operating NPS applications. It may not be reproduced in any form without prior written permission from NPS, LLC.

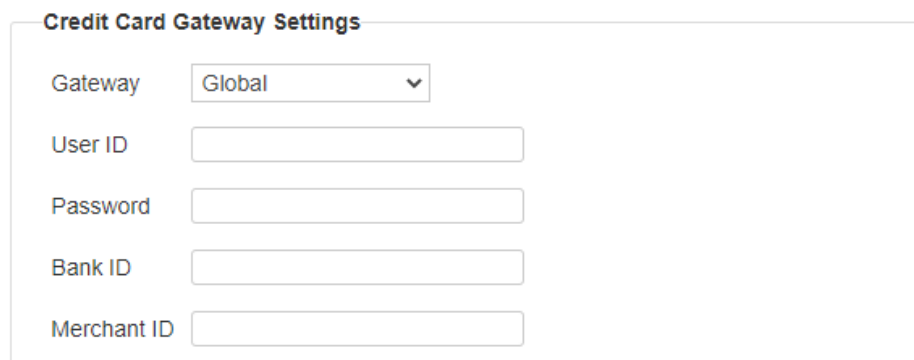

## TSYS TransIT Recertification

NPS Direct has completed a recertification with TSYS. PS Direct utilizes the TransIT API 3.0 to integrate with TSYS for authorization and capture processing for credit card transactions in the U.S. Clients are required to have a TSYS merchant account that has access to the TransIT API 3.0 platform.

## Global Payments Integration and Certification

NPS Direct has completed an integration and certification to the Global Payments Greenhouse South Authorization Platform (GSAP), utilizing the GSAP ISO 8583 message format. The new integration will allow PS Direct clients to utilize authorization and capture processing on the Global GSAP platform. Clients are required to have a Global Payments merchant account that is configured for and has access to the Global GSAP platform.

Following is an example of the Credit Card Gateway Settings section which shows Global as the Gateway; along with descriptions of other fields:

A screenshot of a web form titled "Credit Card Gateway Settings". The form contains five fields: "Gateway" is a dropdown menu with "Global" selected; "User ID", "Password", "Bank ID", and "Merchant ID" are all text input fields.

Credit Card Gateway Settings	
Gateway	Global
User ID	
Password	
Bank ID	
Merchant ID	

**Gateway** – Always set to Global

**User ID** – The user name assigned to the merchant by Global Payments

**Password** – A user-defined value (e.g., such as global1234 or some variation). This field isn't an actual password that is validated and nor is it used to process transactions; but a placeholder or a value is required in order to proceed.

**Bank ID** – The bank ID assigned to the merchant bank by Global Payments (also referred to as the Acquirer Institution ID)

**Merchant ID** – A unique ID used to identify the merchant. This value is assigned to the merchant by Global Payments (also referred to as the Card Acceptor ID).
